(54) DISCOUNT MANAGEMENT SYSTEM

(57)Abstract:

PURPOSE: To simplify preparations for bar codes for period-limited service time service by providing a settling terminal for extracting discount information from read bar code data and performing a discount setting process for an article on the basis of the read discount information.

CONSTITUTION: On the basis of article information including discount information on an article which is inputted from an input means 12, the article information is converted by a converting means 13 into bar code data. On the basis of the converted bar code data, a bar code where the discount information is recorded is outputted to an output means 16. The outputted bar code is read out by a bar code read means 24, the discount information is extracted from the read bar code, and on the basis of the

discount information, a discount setting means 30 performs the discount settling processing for the article. 多額元バーコード
Consequently, preparations of bar codes for special service such as for period-limited service and time service can be simplified to save the labor of salesclerks.
